A new generation of engineered flooring, Multi-Strip™ Plus Engineered offers all the benefits of our original engineered product in a leaner more environmentally friendly size. Multi-Strip™ Plus is a 2-Ply engineered product consisting of a sawn veneer on the surface with a solid hardwood backing. Multi-Strip™ Plus' look is identical to traditional solid strip flooring.

Why Choose Multi-Strip™ Plus (1) A more Stable Product that will have less expansion and contraction. **(2) Unique Flexible Design** results in an even and smoother floor. **(3) Multi-Strip™ Plus is Bonded to Solid Hardwood Slats** and is proven to perform far better than standard engineered floors that are bonded to plywood cores.
