

OWENS FLOORING COMPANY

An Owens Family Company

Plank*floor.*

SOLIDLY ENGINEERED
UNFINISHED HARDWOOD FLOORING

THE LOOK & WEARABILITY OF 3/4" SOLID WOOD THE STABILITY & VERSATILITY ONLY AVAILABLE WITH ENGINEERED WOOD

ADDITIONAL ADVANTAGES INCLUDE:

- * LONGER AVERAGE LENGTHS
- * WARRANTED OVER IN-FLOOR RADIANT HEAT SYSTEMS
- * INSTALLATION METHODS INCLUDE GLUE OR NAIL DOWN
- * THICK WEAR LAYER ALLOWS MULTIPLE SANDINGS (IF REQUIRED)
- * GREATLY REDUCED EXPANSION AND CONTRACTION DUE TO HUMIDITY CHANGES
- * YOU CAN HAVE THE LOOK OF A 3/4" SOLID HARDWOOD FLOOR WITHOUT COMPROMISING STABILITY

White Oak - Select
(3", 4" & 5" Pattern)

3" Eucalyptus - Select

Plankfloor is available in eleven wood species and standard widths of 2-1/4", 3", 4", 5" and 6".

VARIETY OF INSTALLATIONS - Concrete, plywood or an in-floor radiant heating system are no problem for a Plankfloor installation. Glue Down and Nail Down methods of installation make Plankfloor the versatile choice for every level of your home.

Location:
Residential Home (Lake Wisconsin, WI)

◀ Handscraped Walnut

SOLIDLY ENGINEERED HARDWOOD FLOORING

Using only the finest hardwoods, our floors are stunning, reliable and easy to clean. You can install it on any level of your home or commercial installation, whether it's above, on, or below grade. It can even be installed over in-floor radiant heat systems.

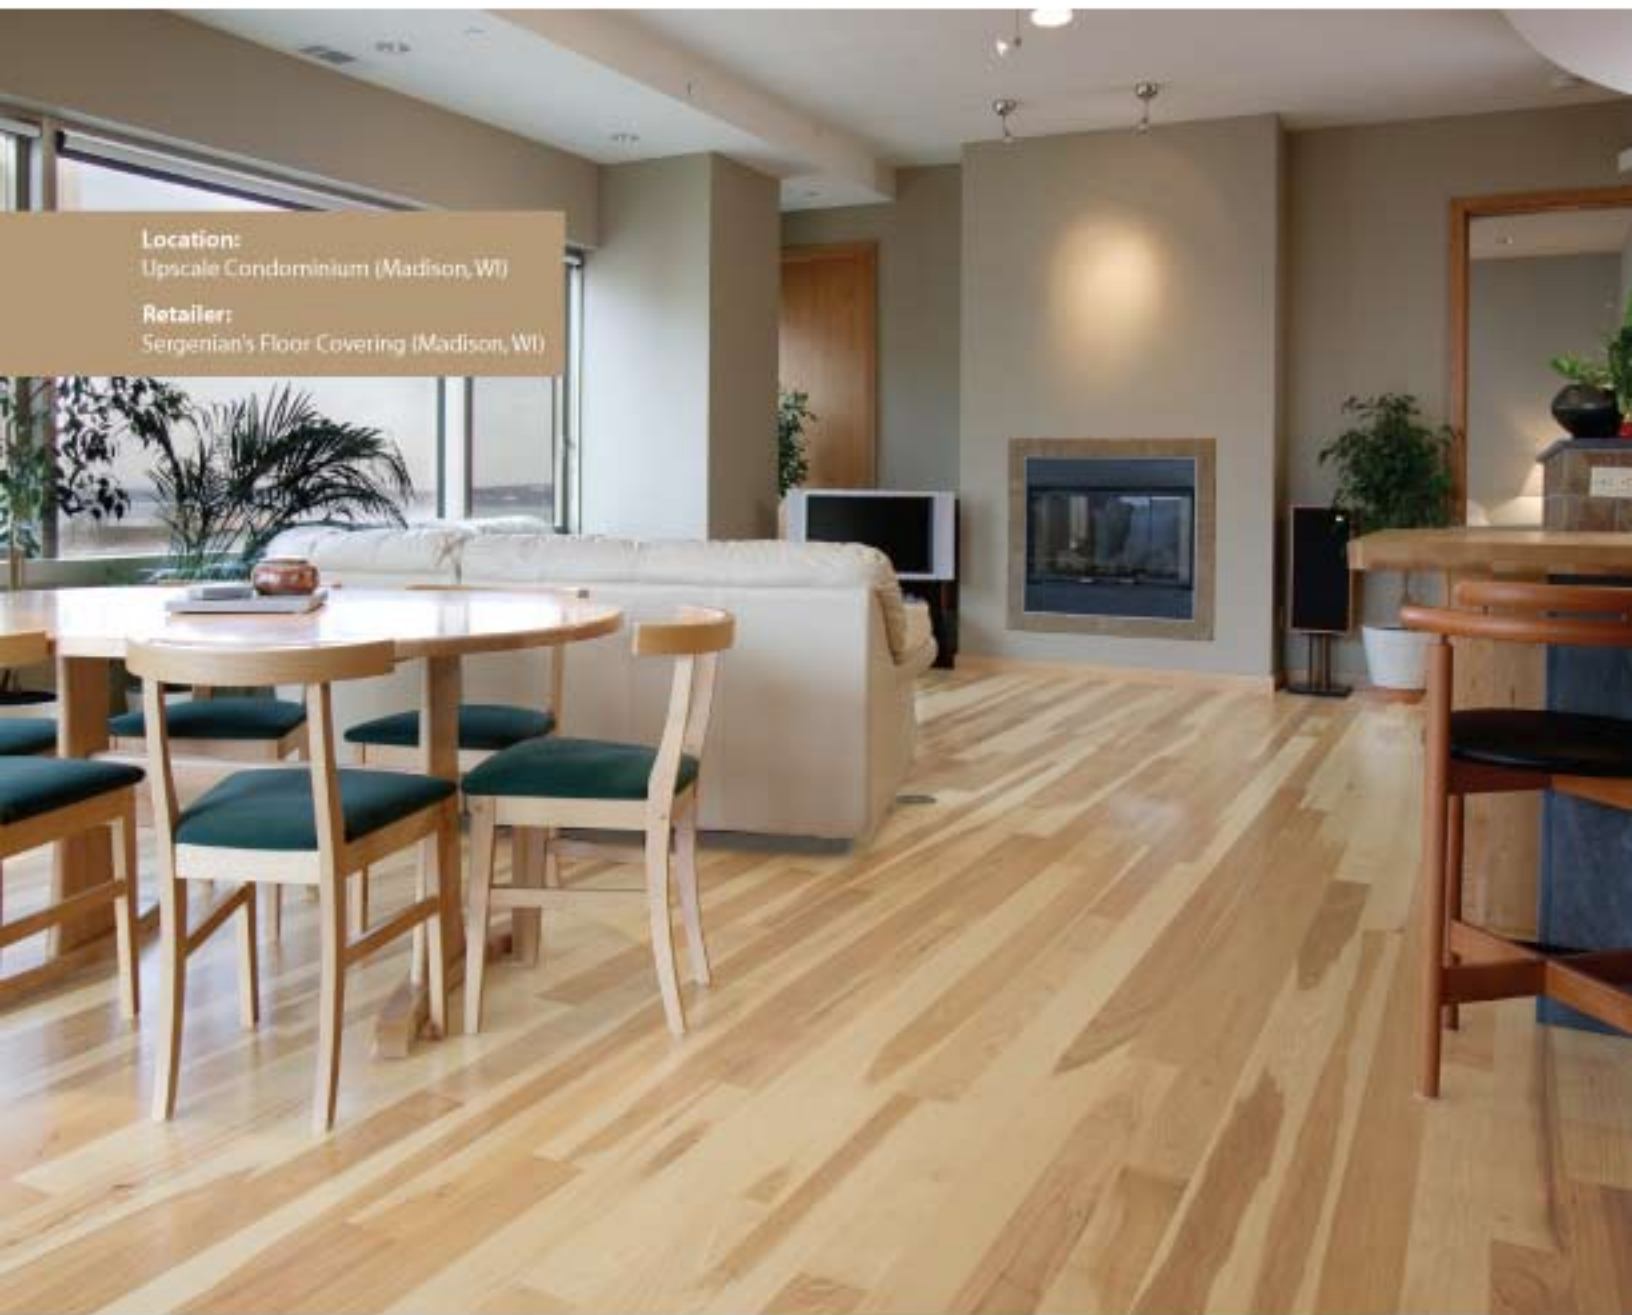

What makes Plankfloor so unique? It's engineered with a wear layer of 3/16" sawn lumber and a multi-ply Ultra-Stable hardwood core for reliability. The result is a beautiful hardwood floor that you'll enjoy for a lifetime.

Location:

Upscale Condominium (Madison, WI)

Retailer:

Sergenian's Floor Covering (Madison, WI)

In this Beach house, White Oak Rift & Qtr. adds a elegant pattern. The floor uses 3", 4", and 5" alternating widths.

3" Sapele Select is pictured on the cover.

In this contemporary condo, Hickory adds an attractive natural pattern. This floor was installed over concrete using the glue-down method. (4" width / 1 & Better)

Plankfloor. AN UNCOMPROMISING CHOICE

Owens Flooring Company is dedicated to providing hardwood flooring in an environmentally responsible way. Plankfloor was developed to provide a hardwood floor with the look and wearability of solid wood flooring with the stability and versatility of an engineered product. The Plankfloor design maximizes utilization of nature's greatest renewable resource while providing you with an uncompromising choice you will enjoy for a lifetime.

The greatest yield of wood fiber results from trees converted into composite materials such as plywood. But, lumber is essential to the manufacturing of high quality wood flooring. Plankfloor's design maximizes the utilization of lumber in creating our wear layer.

Our wear layer combined with a plywood core results in the look and wearability of a solid wood floor while using half the number of trees!

AVAILABLE SPECIES

		*Hardness
	RED OAK	1290
	WHITE OAK	1360
	HICKORY	1820
	HARD MAPLE	1450
	WALNUT	1010
	AMERICAN CHERRY	950
	BRAZILIAN CHERRY	2350

	AUSTRALIAN CYPRESS	1375
	SANTOS MAHOGANY	2200
	SAPELE	1510

*Hardness based on Janka Ball Testing. The higher the number, the harder the wood species.

THE *Plankfloor*. ADVANTAGE

COMPARE FOR YOURSELF

Plankfloor®: 3/16" Sawn Lumber Wear Layer

Solid Wood: 3/4"

- 3/16" Sawn Lumber Wear Layer
- 11 Species (Unfinished)
- Long Lengths: 1' to 7-1/2' (Random)
- Widths: 2-1/4", 3", 4", 5" and 6"
- Variety of Installation Methods: Glue Down or Nail Down
- Handscraped Available

Not many floors compare to Plankfloor. Our wear layer is 3/16" sawn lumber, similar to the wear layer on 3/4" solid hardwood. The stability of Plankfloor is directly tied to its multi-layer construction. Because of its multi-ply cross lamination, Plankfloor is perfect in areas not normally recommended for a 3/4" solid hardwood floor. This is what we consider an important "Plankfloor Advantage".
